STOPS RISING AT	\$50,100	\$50,100
DAILY LOSS LIMIT	None	\$1,000: ends the day, doesn't fail the account
CONSISTENCY	None	None
MINIMUM DAYS	1	1
TIME LIMIT	30 calendar days	30 calendar days

Firm notes

- **Intraday trailing:** Apex 4.0 rules (accounts bought from March 2026). The floor follows the unrealized high and locks at \$50,100. No daily loss limit or minimum days; 30 days to pass.
- **End-of-day trailing:** Apex 4.0 rules. The floor is recalculated at the close (4:59:59 PM ET). \$1,000 daily loss limit (including unrealized): it closes positions and pauses the day, it does not fail the account. The help center is not clear on where the floor stops rising: \$50,100 is assumed.
- Funded (PA) accounts: 50% consistency to withdraw and a \$2,000 drawdown on 4.0 accounts (\$2,500 on older ones). Check your dashboard.

What fails the account

- Your balance touching the drawdown floor. On end-of-day accounts the floor is set at the close but monitored during the session.
- Breaking the conduct rules:
 - **News:** No orders on both sides of price around news and no directionless brackets
 - **Bots:** Prohibited (no automation or algorithms)
 - **Trade copying:** Copying trades with other traders is prohibited

Your size with the 10-loss rule

- $\$2,000 \text{ buffer} \div 10 \text{ losses} = \$200 \text{ per trade}$. On Micro Nasdaq (\$2 a point), with a 20-point stop: 5 micros.
- With its \$1,000 daily loss limit, 5 losses of \$200 in a row end your day.
- The buffer is today's: if you're down \$800, you have \$1,200 left and your risk drops to \$120 per trade.

Before you buy

- Run your numbers through the evaluation simulator: fondeoreal.com/en/simulator
- If you use NinjaTrader, the Prop Firm Copilot shows you every day how far you are from the floor: fondeoreal.com/copiloto
- Check that the way you trade (news, bots, copiers) is allowed.
