Firm notes

- Pro plan, checked Oct 22, 2026. Open losses count in real time, and if you go 7 calendar days in a row without trading the account can be closed. Where the floor stops: its end-of-day drawdown article says at \$50,100 (what we simulate); the Pro plan page says it keeps trailing until the first payout. Ask before you buy. Rapid EOD uses 30% consistency and 4 minimum days.

What fails the account

- Your balance touching the drawdown floor. On end-of-day accounts the floor is set at the close but monitored during the session.
- Breaking the conduct rules:
 - News:** Straddles and strangles around any news release are prohibited on all accounts; Rapid and Pro funded: flat with no orders from 2 minutes before to 2 minutes after FOMC, minutes, payrolls and CPI (and EIA inventories or agricultural reports if you trade energy or ags)
 - Bots:** Allowed if they're yours, with your own settings; no HFT and no exploiting simulated fills
 - Trade copying:** Allowed between your own accounts (Tradesyncer or Tradovate's group copier); copying another trader is prohibited

Your size with the 10-loss rule

- \$2,000 buffer $\div$ 10 losses = \$200 per trade. On Micro Nasdaq (\$2 a point), with a 20-point stop plus costs: 4 micros.
- The buffer is today's: if you're down \$800, you have \$1,200 left and your risk drops to \$120 per trade.

Before you buy

- Run your numbers through the evaluation simulator: fondeoreal.com/en/simulator
- If you use NinjaTrader, the Prop Firm Copilot shows you every day how far you are from the floor: fondeoreal.com/copiloto
- Check that the way you trade (news, bots, copiers) is allowed.
- Once funded, check whether you can request a payout: fondeoreal.com/en/lab/prop-firm-payout-calculator
