Firm notes

- Tradeify help center (Oct 16, 2026): \$3,000 target (\$2,500 on accounts bought before the new dashboard), \$2,000 end-of-day drawdown enforced in real time, no daily loss limit in the evaluation and a 40% consistency rule (3 days minimum). Where the floor stops rising is not clear in the help center: starting balance + \$100 is assumed.
- The Growth plan (\$1,250 daily loss limit according to third-party sites) is not verified in its help center.

What fails the account

- Your balance touching the drawdown floor. On end-of-day accounts the floor is set at the close but monitored during the session.
- Breaking the conduct rules:
 - News:** No news rules
 - Bots:** Only if you are the sole owner, with video verification and not used at other firms
 - Trade copying:** Copying from or to other people's accounts is prohibited

Your size with the 10-loss rule

- \$2,000 buffer $\div$ 10 losses = \$200 per trade. On Micro Nasdaq (\$2 a point), with a 20-point stop: 5 micros.
- The buffer is today's: if you're down \$800, you have \$1,200 left and your risk drops to \$120 per trade.

Before you buy

- Run your numbers through the evaluation simulator: fondeoreal.com/en/simulator
- If you use NinjaTrader, the Prop Firm Copilot shows you every day how far you are from the floor: fondeoreal.com/copiloto
- Check that the way you trade (news, bots, copiers) is allowed.
